Calculations are from the front glass of the lens and are accurate to approximately +/- 3.5%.

Specifications are subject to change without prior notice.

This projector should be transported with no lens installed.

* These lenses require adapter AH-25841 (one included with projector).

** These lenses require adapter AH-25871.

*** These lenses are supplied complete with adapter.

How to use the T/W column. If your screen size does not appear on this chart, use the T/W column to find the lens you need. Divide the Throw distance by the screen Width to get your "target T/W number". Then, look for a lens with a T/W range that covers

Understanding Lens Shift. The numbers in the Shift/Limits column express the projector positions possible as a ratio of the image height. Above: Below a line drawn perpendicular to the screen between the lens and the screen. 1:1 = center of the image. 10:0 = top of the image.
