

WorkLite, This is a new product line for Interspace Industries. We were asked to come up with a new Idea for a light on a desk that will give control, has good quality white light and switchable blue or red light for back stage.

A light for the AV, Rentals and Staging Industry, where all disciplines need directional and controllable light. Most of all reliable, this is designed to keep working every time it is hauled out of the unit box, drop kicked and sat on. We are very pleased with the clarity of this product – we have used near daylight **White** LEDs for a colour that's easy on the eye, **Blue** or **Red** for backstage lighting so as not to be obtrusive to the audience & the ability to mix either of these with the white. A stand that allows tilt and various mounting positions as well as free standing.

Main Features

- Reliable and solid
- Variable dimmer controls
- Easy angle. Easy position
- Low Power sub 4W consumption
- Approx 300 LUX
- Daylight colour approx 6-7000 (K)
- Blue or Red can be used independently of white or either one mixed with white.

3 Year Limited Factory Warranty

Pencil drawing by Linda Huber - Imaginee Art - www.midtel.net/-imaginee

Desk lighting as it should be - controllable

Specifications

Power
12V DC 350mA Max
Supplied with a 12V power adaptor

Connections
2.1mm DC ferrule

Dimensions mm (inch)
DxWxH
